Hi Eric,

Thanks for the Dec. 5, 2011 response on the air samplers used during the Las Conchas Fire by EPA. San Ildefonso Pueblo would like to know what the following mean: Results, Validated Results and Net Concentration. Thanks for your help.

Happy New Year,

Michael Ortiz, Bureau Chief  
Radiation Control Bureau  
NMED/ EDP

Hi Eric,

Thanks for sending the information on the air samplers used for San Ildefonso Pueblo. Other Questions asked were not included in your response. What does Result mean? What does Validated Result mean? What does Net Concentration mean? Also, was the air sample used at San Ildefonso a HQ mid-Vol air sampler? The attachment you send are a little hard to read. Thanks for your help. As soon as you provided me the answers I will send them to San Ildefonso Pueblo.

Thanks again,

Michael Ortiz, Bureau Chief  
Radiation Control Bureau  
Environmental Protection Division

Mr. Ortiz

I'm sorry for the delay in relaying this information but I thought it was previously provided to you. Please let me know if there is anything else you need.

Roger

Above are 2 documents that annotate and provide Cal/maintenance date, sampler type, and serial number to the specific air sampler we used at San Ildefonso Pueblo.

We used the CF-903 variable air sampler  
Serial Number 19450  
EPA system # 1189  
Cal/ Maintenance date 02/2011
